

ENTERPRISE APPLICATION DEVELOPMENT

Effective and Innovative Software solutions!!

ABOUT INTERRA SOFTWARE DEVELOPMENT

We offer our clients high-quality and cost-effective Software Development Services that enable them achieve their business objectives.

We leverage strongly on our experience in system integration and multi-technology platforms.

Our software development team possesses proven skills in translating business needs into project requirements throughout the phases of Software Development Life Cycle (SDLC).

...MISSION...

“ *To be the pre-eminent provider of Enterprise Applications Solutions that deliver on quality, innovation and cutting edge technology.* **”**

...VISION...

“ *To increase the Productivity and Competitive advantage of our clients by providing superior software service.* **”**

Our SERVICES

We offer our clients unique software development services in the following areas;

- Web development
- Mobile App development
- E-commerce applications
- Software Analysis and design
- Software Quality Assurance and Testing
- Software Upgrade
- System Programming
- UX & UI design
- Payment Gateway Integration

We also offer independent consulting services of different scopes such as:

- Supporting and maintaining existing systems
- Enterprise Application integration and CRM integration
- Recommending specific technologies
- Transitioning to newer technologies
- Software project planning and management

Our PROJECTS

INTERNATIONAL PREGNANCY ADVISORY SERVICES - MMS

This is a mobile monitoring system that enables reports and records to be uploaded for viewing. It saves time in finding reports on the activities of organizations. The application also allows report scheduling and notification.

CBN - CUSTOMER COMPLAINTS MANAGEMENT SYSTEM(CCMS)

This system allows banks send in their complaint logs to CBN for resolution. It also generates various reports based on analysis of complaints data and promotes Capacity building and knowledge transfer for CCMS users and system administrators.

INTERRA PAYROLL

This is a web-based application built to assist organisations automate and simplify the handling of all financial activities.

SMS SCHEDULER PRO

This is an SMS Scheduling application that allows users prepare messages that are automatically sent on a scheduled date. [Http://ow.ly/7XUji30ahA0c](http://ow.ly/7XUji30ahA0c)

AMFANI

Amfani is a Human Resource Management Company that effectively match makes applicants to employers. This makes job hunting and recruitment process easier, intuitive and effective for both would be applicants and Organizations looking for quality candidates to fill available positions. The platform effectively allows an Organization manage all its human resources needs such as Recruitment/ Onboarding, Time and Attendance, Leave/ Time-off Management, Performance Management/ Training, Personnel Information management.

SERMS

The School Education Records Management System (SERMS) is a combination of web and desktop application specifically designed to help automate school processes with a view to help save time and money as well as help improve administration and facilitate school processes in real time. It is fast and very efficiently covers the needs of a school.

Guardians are able to monitor their ward's progress real-time and are more involved in their academic progress with real and structured data. www.serms.ng

- On-site and /or off-site development team.
- At least 8 hours a day, 5 days a week of developing work.
- Hardware and software infrastructure.
- A favorable development environment, guaranteeing timely communication and mutual collaboration.
- Agile-Scrum and Iterative development cycle
- Regular project meetings; daily and weekly working report are available.
- Normative coding style.
- Proper documentation.

How we deliver our service:

- ✓ According to your request, we can allow you interview the development team before starting out.
- ✓ We can provide a period of trial development work to help you know our developers' capability and decide if you can go for a long-term partnership with us or not.
- ✓ Our competitive pricing is quoted based on the technical level, programming expertise required, and the project scope. We also allow negotiations depending on the type of project and the budget.
- ✓ At the commencement of the project, we will always communicate directly by email, instant messages, or telephone, so that the off-site team members can respond promptly while working with your team.
- ✓ You can monitor the progress of the off-site team using web-based project management tools such as Asana, Team viewer and Skype. We will submit daily or weekly progress reports tailored to your needs.

How you can help us:

Effective collaboration gets twice the result with half the effort. In order to create a successful bridge between us, we need the following minimum prerequisites:

- Documented project specification or the detailed requirement about what you want.
- Open communication through e-mail, chat or telephone.
- Your periodic feedback about our work.

OUR PROJECT LEADERS

Interra brings together a team of developers with deep knowledge and practice in software development to deliver world-class solutions.

GERALD MANYO

Gerald has a 10 year experience in developing soft-ware applications. As the Head of Interra's Software Development Team, he is responsible for the company's overall development and deployment of software projects. His experience covers the design, development and deployment of database, Websites, Web services and mobile applications. He led the team in developing and deploying CBN Customer Complaints' Management System and INEC Staff Databank. Gerald's feat in the company has seen her own a School Records Management system, Payroll System, Monitoring and Evaluation tool and HR Feedback system.

Gerald has a bachelor's degree in Computer Systems Engineering and a Masters in Software Support and Management for Data-Computing Systems and Networks. Both degrees were received from the Saint Petersburg State Electro-Technical University (LETI), Russia. He is highly proficient in Java, Python, C#, Ruby on Rails, PHP, C++ and Visual Basic.Net, MySQL, SQLite and Prestashop.
